

USB Driver Installation Guide for USB PC Cable 30-3290

1. Installing USB drivers on Windows Vista/XP/2000

To install any new driver on Windows Vista/XP/2000 you need to have administrator privileges.

- 1.1 Insert the USB cable 30-3290 into the USB port on your PC. The computer will automatically detect it and the Found New Hardware Wizard will open. Click "Cancel" and remove the USB Cable.

- 1.2 Locate and execute "CDM 2.02.04.exe" in the supplied CD-ROM.

You can find "CDM 2.02.04.exe" in the following directory:

For Windows 2000:

\\Version1_2\USB Cable Driver\Win2000\CDM 2.02.04.exe

For Windows Vista:

\\Version1_2\USB Cable Driver\WinVista\CDM 2.02.04.exe

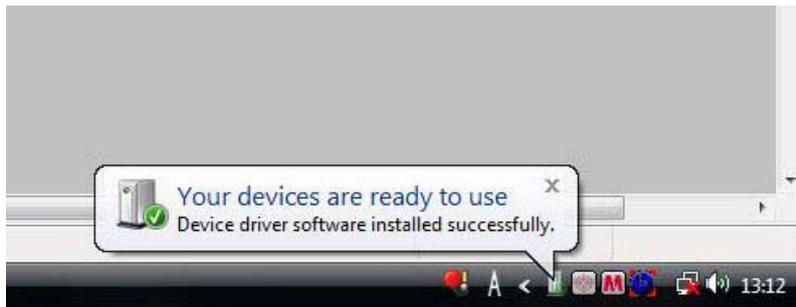

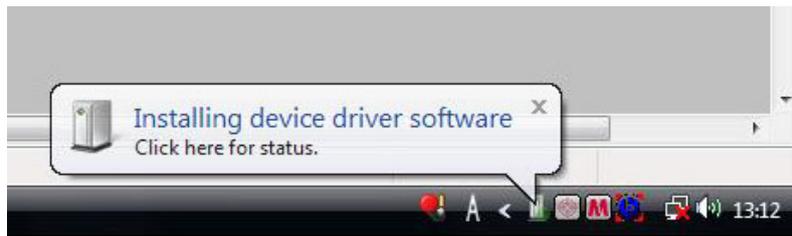

For Windows XP:

\\Version1_2\USB Cable Driver\WinXP\CDM 2.02.04.exe

- 1.3 When "CDM 2.02.04.exe" is finished, connect the USB cable 30-3290 to the USB port again.

- 1.4 PC automatically starts installing the USB cable driver.

When using Windows Vista/ XP, the following USB Driver installing message will be displayed on the task tray. ((The message may differ depending your operation system version.)

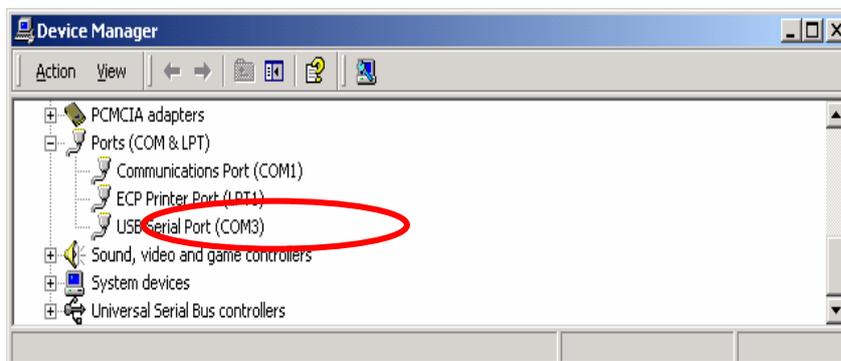

When using Windows 2000, the following indication will be displayed.

2. Confirming COM Port on Windows Vista/XP/2000

- 2.1 After clicking "Finish", the Found New Hardware Wizard will continue installing the COM port emulation driver. The procedure is the same as that above for installing the serial converter driver.
- 2.2 Open the Device Manager (located in "Control Panel>System") then select the "Hardware" tab and click "Device Manger") and select "View > Devices by Type". The device appears as an additional COM port with the label "USB Serial Port".

Note: The actual USB Serial Port number may differ from that shown depending on the PC.

3. Installing USB drivers on Windows 98

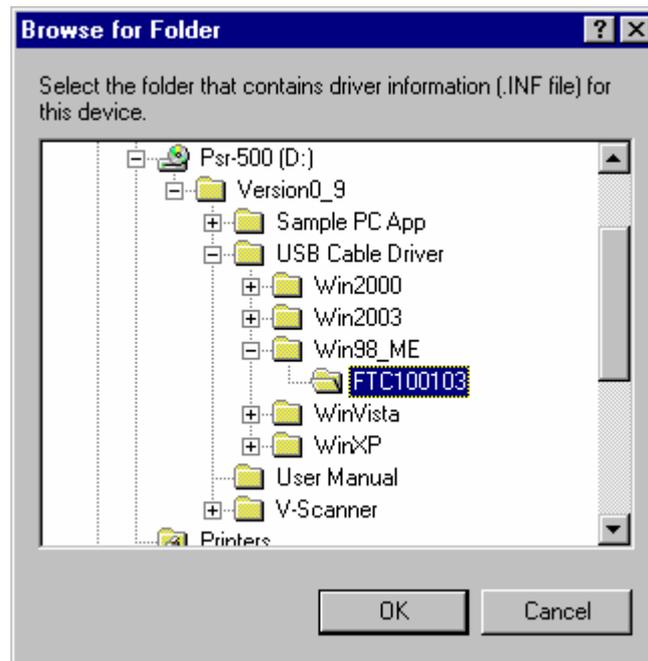

- 3.1 Connect the device to a spare USB port on your PC. This will launch the Windows Add New Hardware Wizard.
- 3.2 Windows may display a message reading "Building driver database" at this point which may take a few minutes to pass. Click "Next" to proceed with the installation.

- 3.3 Select "Search for the best driver for your device. (Recommended)." as shown below and then click "Next".

- 3.4 Check the box next to "Specify a location" and uncheck all others as shown below. Click "Browse" and locate the driver file in CD-ROM.
(CD-ROM drive: \Version1_2\USB Cable Driver\ Win98_ME\FTC100103\FTDIBUS.INF)

Once the files have been located, click "Next" to proceed with the installation.

- 3.5 Windows may display a message reading "Building driver database" at this point which may take a few minutes to pass. Once Windows has found the required files, click "Next" to install the device.

- 3.6 Windows should then display a message indicating that the installation of the serial converter driver was successful. The COM port emulation driver must now be installed. Click "Finish" to complete the installation of the serial converter and proceed to the COM port emulation driver.

- 3.7 The COM port emulation driver must now be installed. Click "Finish" to complete the installation of the serial converter and proceed to the COM port emulation driver.
- 3.8 The COM port emulation driver will be automatically installed from the same location as the serial converter driver.

4. Installing USB drivers on Windows Me

- 4.1 Connect the device to a spare USB port on your PC. This will launch the Windows Add New Hardware Wizard.
- 4.2 Windows may display a message reading "Building driver database" at this point which may take a few minutes to pass. Click "Next" to proceed with the installation.

- 4.3 Select "Automatic search for a better driver (Recommended)."

- 4.4 Insert CD-ROM into PC's CD Drive
- 4.5 PC automatically starts installing the USB Driver.

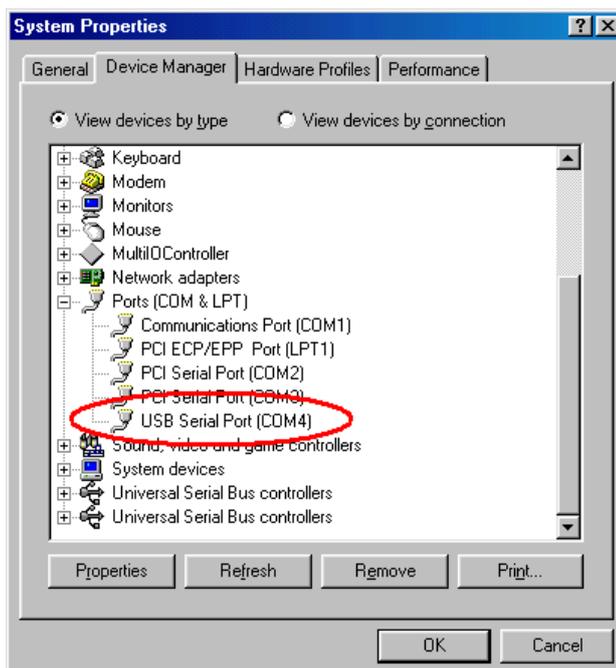

- 4.6 When installing the driver is finished, the following display will be displayed. Then click "Finish" The COM port emulation driver must now be installed.

Note: After "Finish" is clicked, the display "Windows has found the following hardware" may sometimes appear again. In such case, repeat the above driver installation steps.

5. Confirming COM Port on Windows 98/Me

- 5.1 Open the Device Manager (located in "Control Panel\System" then select the "Device Manger" tab) and select "View devices by type". The device appears as an additional COM port with the label "USB Serial Port".

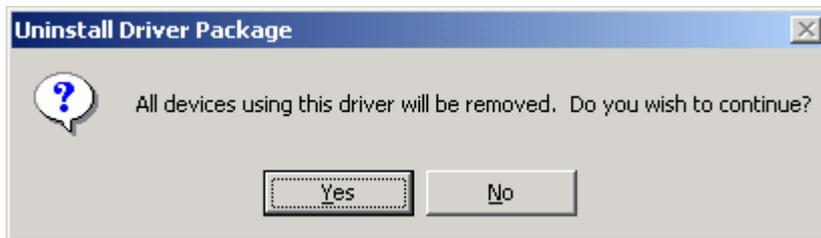

Note: The actual USB Serial Port number may differ from that shown depending on the PC
